Mathematics Solutions Solutions for Class 8 Math Chapter 1 Rational And Irrational Numbers are provided here with simple step-by-step explanations. These solutions for Rational And Irrational Numbers are extremely popular among Class 8 students for Math Rational And Irrational Numbers Solutions come handy for quickly completing your homework and preparing for exams. All questions and answers from the Mathematics Solutions Book of Class 8 Math Chapter 1 are provided here for you for free. You will also love the ad-free experience on Meritnation's Mathematics Solutions Solutions. All Mathematics Solutions Solutions for class Class 8 Math are prepared by experts and are 100% accurate. Show the following numbers on a number line. Draw a separate number line for each example. (1) 32, 52, -32 (2) 75, -25, -45 (3) -58, 118 (4) 1310, -1710 1 32,52,-32 can be represented on the number line as follows. 2 75,-25,-45 can be represented on the number line as follows. 3 -58,118 can be represented on the number line as follows. 4 1310,-1710 can be represented on the number line as follows. Page No 2: Observe the number line and answer the questions. (1) Which number is indicated by point B? (2) Which point indicates the number 134? (3) State whether the statement, 'the point D denotes the number 52, is true of false. (1) We observe that each unit on the number line is divided into 4 equal parts. Now, B is the tenth point on the left of 0. So, B indicates -104 on the number line. 2  $134 = 74 = 7 \times 14$  So, the seventh point on the right of 0 is C that indicates 134 on the number line. (3) The point D is the tenth point on the right of 0. So, D indicates 104 on the number line. Now,  $104 = 52$  So, D denotes 52 on the number line. Hence, the given statement is true. Page No 3: Compare the following numbers. (1) -7, -2 (2) 0, -95 (3) 87, 0 (4) -54, 14 (5) 4029, 14129 (6) -1720, -1320 (7) 1512, 716 (8) -258, -94 (9) 1215, 35 (10) -711, -34 (1) We know that,  $7 > 2$  ∴ -7 -95. (3) We know that, a positive number is always greater than 0. ∴  $87 > 0$  (4) We know that,  $-5 < 1$ . ∴ -5494 ∴ -258915 ∴ 1215 > 35. (10) Let us first compare 711 and 34.  $711 = 7 \times 411 \times 4 = 2844$ ;  $34 = 3 \times 114 \times 11 = 3344$  Now, 2844
